

6th Assignment: The Evolution of a Shape

In a series of steps, change one shape into another. Use a series of seven steps. It will help you immensely to sketch these ideas out first in pencil, then begin cutting or drawing. The shapes may be cut from paper, drawn, or painted. Arrange your designs within an 6" x 14" format in black and white only. You will then mount your designs to black foam board or matteboard with a 1/2" border all the way around.

Pay particular attention to creating a clear transition between the steps.

Make sure your name is on the back.
